Subject: NO, to letting oil and gas companies destroy Sandoval County

At last nights meeting, it sounded as though your mind is made up to open the doors to those who wish to destroy another state all for a few paltry pieces of silver.

Please, think about the people, plants, and animals who live here and want to stay as healthy as possible.

These oil and gas companies have destroyed all livelihood in every state they have been in and have done nothing about even trying to clean up their mess. It is not as though this is a new thing that know one knows what kind of damage they cause. We need wind farms and solar panels installed the do not destroy our land.

Please reconsider and say NO to this. Be a good steward and encourage your fellows to do the same.

Thank you, Diane Mee
