Dear Commissioner Katherine A. Bruch,

As a member of the community who values our rural character and economic resilience, I'm writing to express my support for the Diamond Tail Solar Project in Sandoval County. This project represents a unique opportunity to bring significant benefits to our area—good-paying construction jobs, stable income for landowners, and critical tax revenue to fund schools and first responders—while respecting the quiet, open spaces that make our county special.

Solar farms are a practical and low-impact use of rural land, ensuring it remains productive without the demands of high-density development. With advanced technology, including energy storage systems, these projects enhance grid reliability and support a stable energy supply for our region while simultaneously supporting New Mexico's renewable energy goals. Importantly, they align with broader efforts to diversify our energy resources and keep energy costs low, which is beneficial for families and businesses alike.

Supporting the Diamond Tail Solar Project is a common-sense step that strengthens our local economy while preserving the values we hold dear. Thank you for your service to our community and for considering this important project.

Sincerely,
Carl Axness

Dear Commissioner Katherine A. Bruch,

I'm a resident of Rio Rancho, writing to express my support for the Diamond Tail Solar Project in Sandoval County. In a time of raging fires, floods, droughts, rising tides, and resulting food and shelter insecurities, the TIME FOR SOLAR IS YESTERDAY. In the light of the President Elects words; "Drill, Baby Drill," we need to take heart, and concentrate local efforts to preserve our beautiful desert. This project will provide quiet, dessert friendly energy, while conserving the tectonic plates and the Rio Rancho natural landscape. The economic opportunities in job creation makes this a win win.

I support the Diamond Tail Solar Project. It's time is now. I love Rio Rancho, and this is an important step in the right direction for both its inhabitants, and it's dessert landscape. Let's show the world, that we give a damn, that this is our mini-Climate-Accord-solar-stepping-economic-rocking, eco-embracing project, to promote and protect all that we hold dear. Thank you for your service to our community and for considering this important project.

Sincerely,
Jennifer Robin Orellana

This project represents a unique opportunity to bring significant benefits to our area—good-paying construction jobs, stable income for landowners, and critical tax revenue to fund schools and first responders—while respecting the quiet, open spaces that make our county special.

Solar farms are a practical and low-impact use of rural land, ensuring it remains productive without the demands of high-density development. With advanced technology, including energy storage systems, these projects enhance grid reliability and support a stable energy supply for our region while simultaneously supporting New Mexico's renewable energy goals. Importantly, they align with broader efforts to diversify our energy resources and keep energy costs low, which is beneficial for families and businesses alike.

Supporting the Diamond Tail Solar Project is a common-sense step that strengthens our local economy while preserving the values we hold dear. Thank you for your service to our community and for considering this important project.

Sincerely,
Deanna Galkin-Doran

Dear Commissioner Katherine A. Bruch,

As a member of the community who values our rural character and economic resilience, I'm writing to express my support for the Diamond Tail Solar Project in Sandoval County. This project represents a unique opportunity to bring significant benefits to our area—good-paying construction jobs, stable income for landowners, and critical tax revenue to fund schools and first responders—while respecting the quiet, open spaces that make our county special.

Solar farms are a practical and low-impact use of rural land, ensuring it remains productive without the demands of high-density development.
